Spirit & Style

Our team has worked hard to develop metal furniture that combines both form and function. Due to the malleability of metal, we have the ability to create countless design options. Unlike wood, metal furniture has a wide range of colors to work with, from standard primary colors to custom-selected paints. We guarantee high quality finishes that will suite your style.

Durability

Metal furniture lasts a long time because of its inherent properties. All our furniture undergoes testing and treatment for rust and heat resistance. Metal furniture can tolerate heavy usage and does not chip or damage easily. In case there are any missing parts, these are easily replaceable.

Value for Money

Metal is affordable! Due to it's strength and durability, metal generally lasts longer than wood furniture and doesn't run the risk of being exposed to termites. All of our furniture is designed to fit in different room spaces, as we provide flat packing solutions and easy to assemble instructions.

Darwin Sofa cum Bed FK SCB 8017

Darwin is the best Sofa cum bed for a comfortable seating and an attractive piece of furniture that can be a part of your living room. It has a fusion of metal with wooden posts making it a statement piece.
