Range Overview

A premium metal dining set direction for buyers who need repeatable manufacturing, controlled specifications, efficient packing, and durable frames for residential, hospitality, cafe, outdoor, and private-label programs.

Round Bistro

Six-Seat Dining

Compact Folding

Hospitality Contract

Outdoor Patio

Built for repeat supply: metal tube frames, sheet-metal details, powder coating, KD packing, and OEM/private-label specification control.

01 Round Bistro Dining Set

Compact cafe and apartment format

Manufacturing Direction

- Round pedestal table with slim powder-coated tube chairs
- Low footprint for cafes, studio apartments, and small dining areas
- Stackable chair direction can reduce reverse logistics volume
- Suitable for retail, hospitality, and private-label ranges

02 Rectangular Six-Seat Set

Family, villa, hotel-apartment, and retail program

Manufacturing Direction

- Rectangular metal table frame with upholstered metal-frame chairs
- Stable cross-frame direction for repeat project supply
- Knock-down table frame can improve carton size and container loading
- Finish and upholstery options can be localized by buyer segment

03 Compact Folding Dining Set

Space-saving range for rental and small-home buyers

Manufacturing Direction

- Foldable or stackable chair direction for dense shipping
- Simple tube geometry reduces welding complexity and dead weight
- Good fit for apartments, hostels, staff rooms, and online furniture
- Designed for practical durability rather than thin, weak material

04 Hospitality Contract Set

Restaurant, cafe, food court, and project supply

Manufacturing Direction

- Durable metal chair and table systems for high-use environments
- Repeatable frame geometry supports consistent bulk production
- Powder-coated finish direction for clean maintenance and longevity
- Can be supplied as OEM or private-label project furniture

05 Outdoor Patio Dining Set

Terrace, resort, garden, and commercial outdoor use

Manufacturing Direction

- Perforated metal tabletop and breathable chair panels
- Weather-resistant powder-coat direction for exterior programs
- KD table frame and stackable chair approach for export efficiency
- Strong category fit for hospitality, retail, and resort projects

Built Smarter For Repeat Supply

Dining sets should not be made cheaper by simply making the tube thinner. The better direction is controlled frame geometry, fewer unnecessary welds, smarter knock-down construction, optimized carton size, and durable finish systems that survive real use.

- Round, rectangular, folding, restaurant, and outdoor set programs
- Tube-size optimization with proper bracing and load path control
- Knock-down table frames and stackable chair directions
- Powder-coated finish options for indoor and outdoor use
- Carton and container loading optimization for export supply
- Sample-led development before bulk production
